

1.Blame Annotations in GitLens

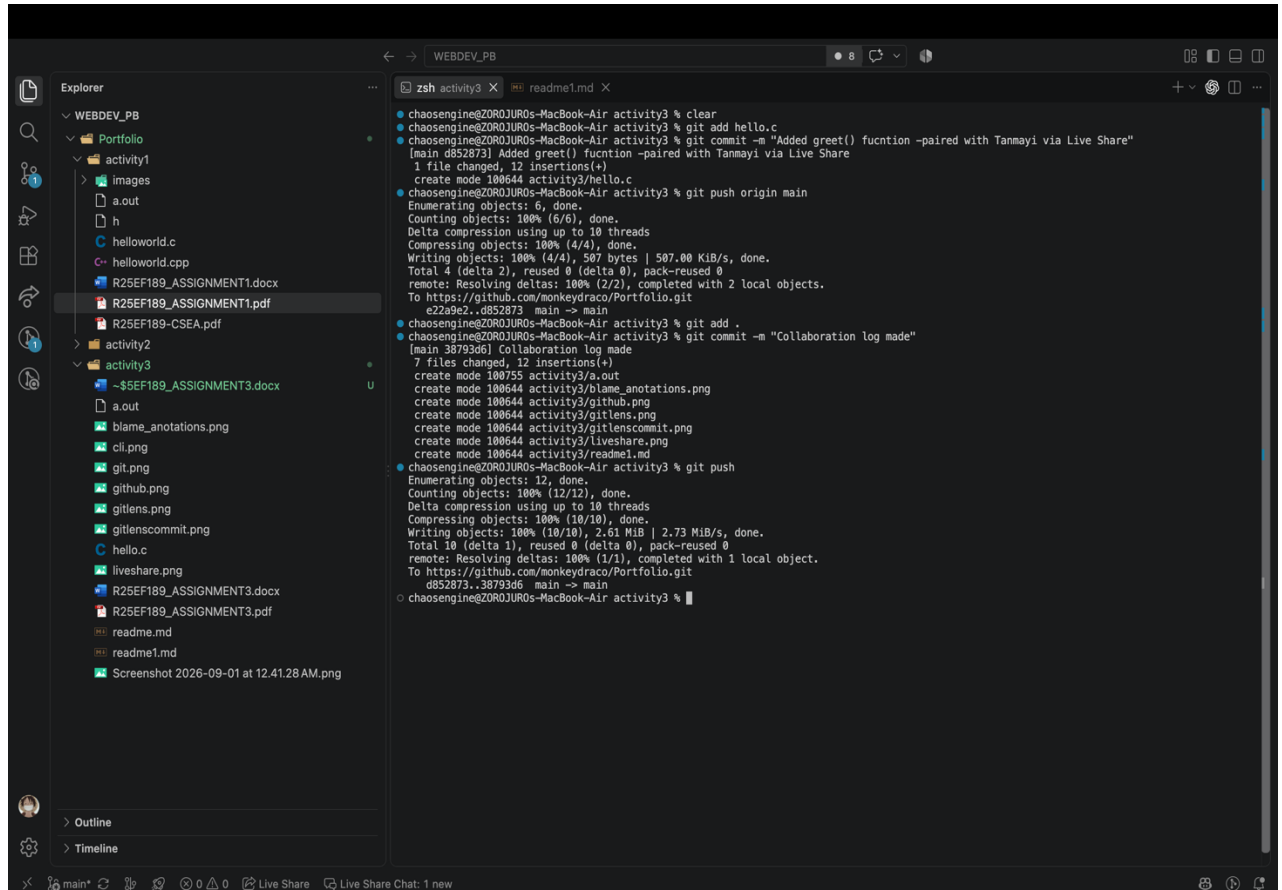

2.Git commit-History

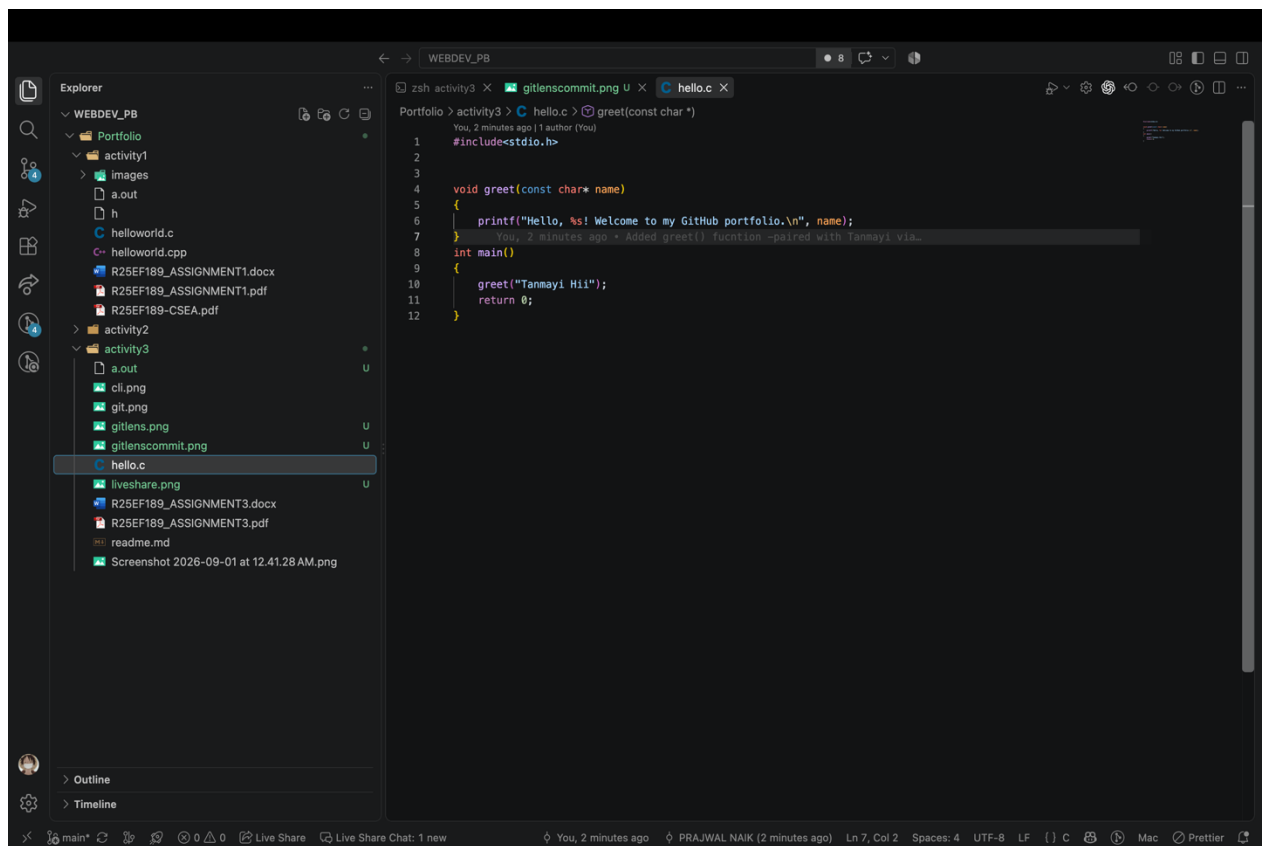

3.Live Share

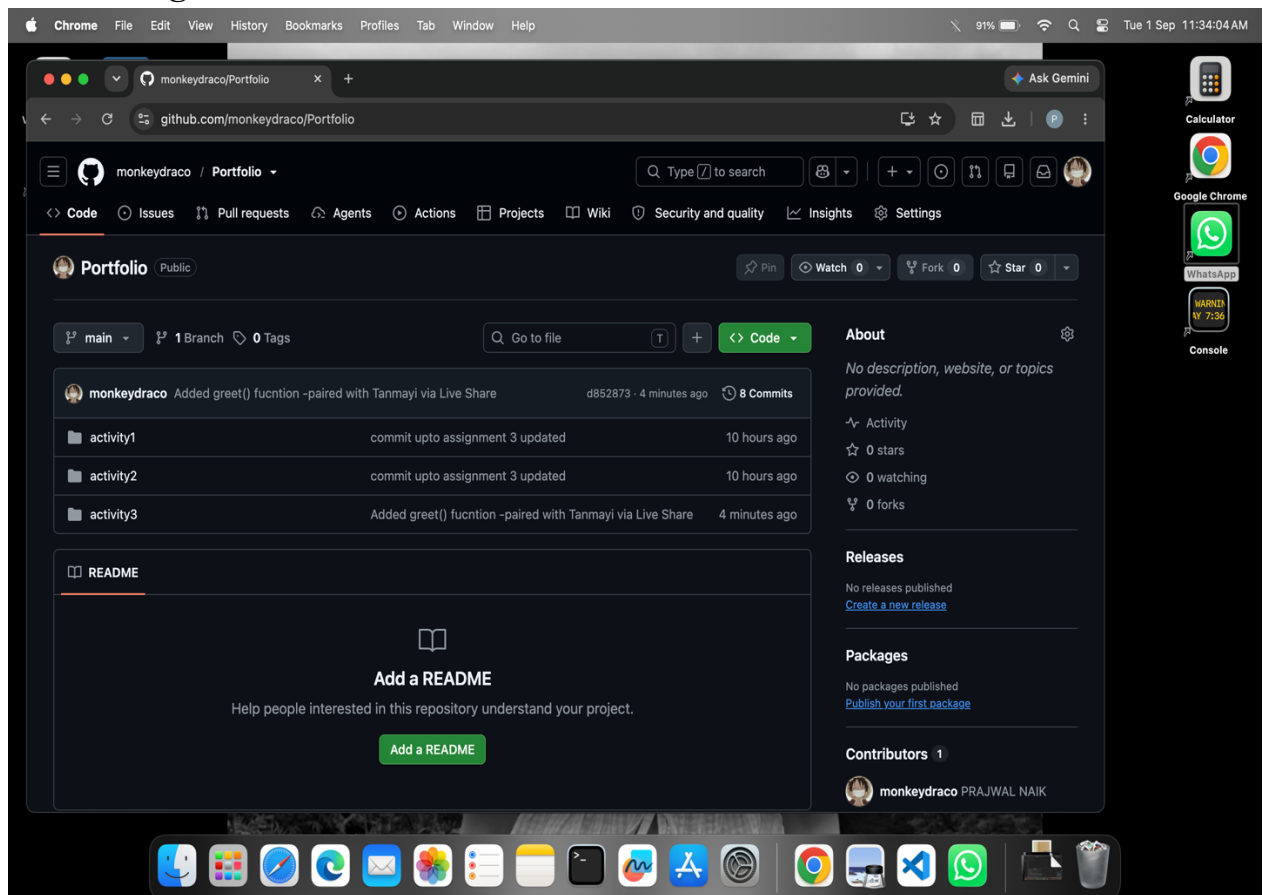

4.Commit, Push using GitHub CLI

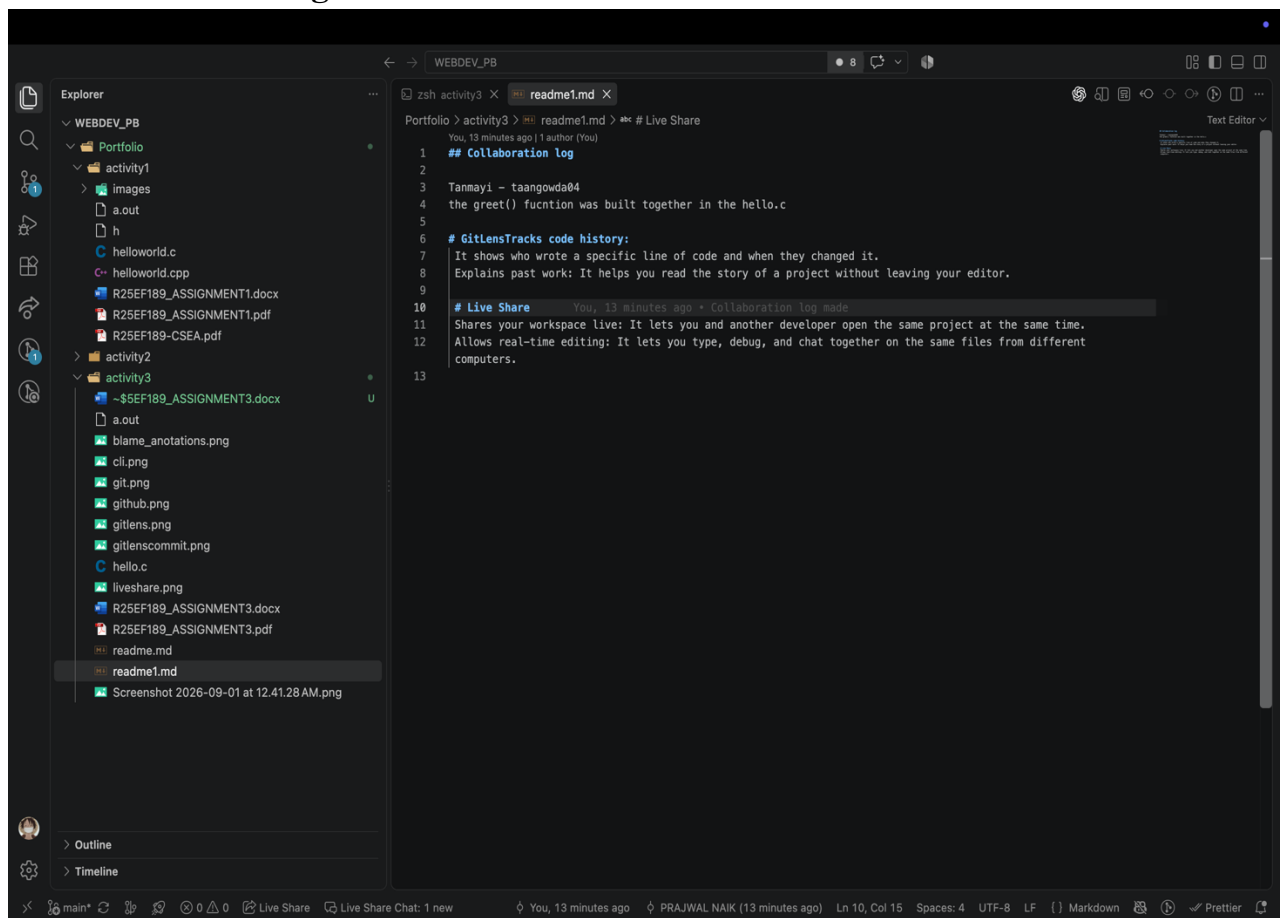

5. Blame Annotations for committed file

6. Checking in GitHub for commits after collaboration

7.Collaboration Log

The screenshot displays the Visual Studio Code interface with a project named 'WEBDEV_PB'. The Explorer sidebar on the left shows a folder structure with 'Portfolio' containing 'activity1' and 'activity2'. 'activity1' has subfolders 'images' and 'h', and files 'a.out', 'helloworld.c', 'helloworld.cpp', 'R25EF189_ASSIGNMENT1.docx', 'R25EF189_ASSIGNMENT1.pdf', and 'R25EF189-CSEA.pdf'. 'activity2' contains 'activity3', which in turn contains 'R25EF189_ASSIGNMENT3.docx', 'a.out', 'blame_annotatons.png', 'cli.png', 'git.png', 'github.png', 'gitlens.png', 'gitlenscommit.png', 'hello.c', 'liveshare.png', 'R25EF189_ASSIGNMENT3.docx', 'R25EF189_ASSIGNMENT3.pdf', 'readme.md', and 'readme1.md'. The main editor window shows the 'readme1.md' file with the following content:

```
1  You, 13 minutes ago | 1 author (You)
2  ## Collaboration log
3  Tanmayi - taangowda04
4  the greet() fuction was built together in the hello.c
5
6  # GitlensTracks code history:
7  It shows who wrote a specific line of code and when they changed it.
8  Explains past work: It helps you read the story of a project without leaving your editor.
9
10 # Live Share You, 13 minutes ago • Collaboration log made
11 Shares your workspace live: It lets you and another developer open the same project at the same time.
12 Allows real-time editing: It lets you type, debug, and chat together on the same files from different
13 computers.
```

The status bar at the bottom indicates the current file is 'main*' and shows various icons for Live Share, Live Share Chat, and other features. The bottom right corner shows the file encoding as 'UTF-8' and the line/col position as 'Ln 10, Col 15'.
